Translating Phrases into Algebraic Expressions Worksheets

Im in 7th grade and I finished this problem in 20 sec and the answer is $x = 2$. step by step is $5x+3=7x-1 \rightarrow$ you minus $5x$ on both sides because it is the smaller variable and you get $3 = 2x-1$. The opposite of subtraction is addition, we need to isolate the x variable by getting rid of the -1 so we do $(-1) + 1$ is 0 and we do it on both sides of the equal sign. then the equation would be $3 + 1 = 2x - 1 + 1$.
