Six years and 75,000 miles ago I bought a Harley and re-entered the world of motorcycles at the age of 55, and I have been having a blast ever since! I also have made every beginner mistake in the book. Wait a minute, what book? There is no beginner mistake book. Well, there is now and I wish I

would have had it six years go. I wrote this book so you can cash in on my experiences and save yourself time, money and hassle. Crammed with beginner mistakes, tips, how-to's and resources, it has what every new or re-entry rider needs to know about riding and gear. It's got all of the stuff they didn't tell you about selecting a starter bike, minimizing risk, riding safety, using the `friction zone', going where you look, buying the right gear the first time and many more basic rider topics. It is easy to read, well organized and laced with a little off-beat humor to make it fun. The single best thing I did when I started riding was to go through the MSF Basic Rider course. The next best thing I could have done would have been buying this book. Reading this book can minimize your learning curve and enable you to start really enjoying your motorcycle today.
