Buses | GILLIG

The AEC Routemaster Bus Wiring Diagram is above the page. "AEC" is a UK company that manufactures vehicles, such as passenger buses (including tourist buses) and trucks from 1912 to 1979.The name is an abbreviation from the "Associated Equipment Company", but in its entirety it was practically not used, and the firm was known under the brands "AEC" and "ACLO".

This report should be of interest to transit bus maintenance managers and others interested in the development of written transit bus maintenance procedures, or "practices," and the sharing of these practices with others in the transit industry. The report provides guidance on how to develop effective transit bus maintenance practices tailored to one's local operating environment. It provides seven sample practices developed using the guidance. Complementing this report is an on-line Web Board sponsored by the Transportation Research Board's Committee on Transit Fleet Maintenance. This Web Board allows transit agencies to post their maintenance practices for others to review, revise as necessary for their own operating conditions, and use. The report provides instructions on how to access the Web Board, use it to develop maintenance practices, and share these practices among transit agencies.

Introduction -- Planning framework -- Estimating BRT ridership -- Component features, costs, and impacts -- System packaging, integration, and assessment -- Land development guidelines.
