CAMARO ENGINE MOUNT BRACKETS

The center mount is for 67-68 high perf 302, 350, 396 engines. The right hand 2 1/8" tall mount is for 69 302, 350, and 396 engines only. The early Camaro engine mounts were not interlocking type, at least on the low perf engines. They just had a block of rubber glued between two plates of metal and would tear allowing the engine to lift up.

CAMARO ENGINE MOUNTS - Pozzi Racing

Differences in V8 Frame Mount Brackets and Engine Mounts All '67-'68 small-block (SB) and '69 307ci and 327ci engines used the same frame mount bracket (approximately 2-1/2 inches wide) attached to the subframe. The 1969 302ci and 350ci engines used a ~3/8 inch shorter and ~1/4 inch narrower bracket.

Camaro - Engine

In most situations, partial VIN numbers were stamped onto the engine-block pad located immediately in front of the passenger's side cylinder head gasket surface. These numbers should be visible, unless the engine has been rebuilt and the block's deck was resurfaced.
