13 CHAPTER 13.1 Aggregate Planning The total production required over the year is 8,400 units, of 700 per month. Thus, the schedule is to produce 700 per month and have no costs associated with work force variation. The only costs incurred will be the monthly production cost, the inventory cost, and the shortage cost. The costs are calculated as follows.

26. © Wiley 2010 26 Chapter 13 Highlights Planning begins with the development of the strategic business plan that provides company direction & objectives for the next two to ten years. Sales and operations planning integrates plans from the other functional areas and regularly evaluates company performance. The level aggregate plan maintains the same size workforce and produces the same output each period.

~~Opm101 chapter13 000 SlideShare~~

This is a fairly long and important chapter. Important points are: 1. Good inventory management is important for successful organizations. 2. The key issues are when to order and how much to order. 3. Because all items are not of equal importance, it
