Internal and External Signals 1. What causes a shriveled potato to grow skinny, pale sprouts? Morphological adaptations for growing in darkness, collectively referred to as etiolation, make sense if we consider that a young potato plant in nature usually encounters continuous darkness when sprouting underground.

Chapter 39 Plant Responses to Internal and External Signals Lecture Outline . Overview: Stimuli and a Stationary Life. At every stage in the life of a plant, sensitivity to the environment and coordination of responses are evident. One part of a plant can send signals to other parts. Plants can sense gravity and the direction of light.
