Reference To The Cisco Servers - Unified Computing - Cisco UCS C-Series Rack ...

A unified computing system (UCS) is a converged data center architecture that integrates computing, networking and storage resources to increase efficiency and enable centralized management. UCS products are designed and configured to work together effectively. The goal of a UCS product line is to simplify the number of devices that need to be connected, configured, cooled and secured and provide administrators with the ability to manage everything through a single graphical interface.
