In 1994, Interface founder and chairman Ray Anderson set an audacious goal for his commercial carpet company: to take nothingfrom the earth that can't be replaced by the earth. Now, Anderson leads the way forward and challenges all of industry to share that goal. The Interface story is a compelling one: in 1994, making carpets was a toxic, petroleum-based process, releasing immense amounts of air and water pollution and creating tons of waste. Fifteen years after Anderson's call for change, Interface has: —cut greenhouse gas emissions by 82%—cut fossil fuel consumption by 60%—cut waste by 66%—cut water use by 75%—invented and patented new machines, materials, and manufacturing processes—increased sales by 66%, doubled earnings, and raised profit margins With practical ideas and measurable outcomes that every business can use, Anderson shows that profit and sustainability are not mutually exclusive; businesses can improve their bottom lines and do right by the earth. Ray Anderson is featured in the film, So Right, So Smart, which takes a behind-the-scenes look at how his leadership transformed Interface into a company with a sustainable business practices that made it more profitable than it was before.

In 1994, Interface founder and chairman Ray Anderson set an audacious goal for his commercial carpet company: to take nothing from the earth that can't be replaced by the earth. Now, in the most inspiring business book of our time, Anderson leads the way forward and challenges all of industry to share that goal. The Interface story is a compelling one: In 1994, making carpets was a toxic, petroleum-based process, releasing immense amounts of air and water pollution and creating tons of waste. Fifteen years after Anderson's "spear in the chest" revelation, Interface has: -Cut greenhouse gas emissions by 82% -Cut fossil fuel consumption by 60% -Cut waste by 66% -Cut water use by 75% -Invented and patented new machines, materials, and manufacturing processes -Increased sales by 66%, doubled earnings, and raised profit margins With practical ideas and measurable outcomes that every business can use, Anderson shows that profit and sustainability are not mutually exclusive; businesses can improve their bottom lines and do right by the earth.

In 1994, Ray Anderson felt a 'spear in the chest': he realised that his company, billion-dollar carpeting manufacturer Interface, Inc, was plundering the environment with its unsustainable business practices, and that it desperately needed to change direction. Under his leadership, Interface went on to set unprecedented targets for cutting waste, instigated revolutionary recycling initiatives, and encouraged employees at every level of the company to contribute ideas on how to save resources. As a result, the company's greenhouse gas emissions decreased by 82% and are on target to reach zero level by 2020. Not only that, these changes also brought down costs, improved quality, and increased profits. In Confessions of a Radical Industrialist, Ray Anderson shares the remarkable story of how Interface turned itself around, and proves that running your company sustainably isn't radical at all - it's just good business.

Of value to business people, environmentalists, and educators alike, Mid-Course Correction is a business book about the environment that's written from a personal perspective. With passion and pride, Ray Anderson, Founder, Chairman, and CEO of one of the world's largest interior furnishings companies, recounts his awakening to the importance of environmental issues and outlines the steps his petroleum-dependent company, Atlanta-based Interface, Inc., is taking in its quest to become a sustainable enterprise - one that will never have to take another drop of oil from the earth.

"America's greenest CEO" and the hero from the award-winning documentary "The Corporation" makes the urgent, compelling case that sustainable business pays. His story is now legend. In 1994, after reading The Ecology of Commerce by Paul Hawken, Ray Anderson felt a "spear in the chest" the founder of Interface, Inc., a billion-dollar carpeting manufacturer, realized that his company was plundering the environment and he needed to steer it on a new course. Since then, Interface has cut its greenhouse gas emissions by 82%, and the goal is to reach zero environmental footprint by 2020. Thoughtful and winning, Confessions of a Radical Industrialist shows how Anderson revolutionized his company, in the process bringing costs down, improving quality, making it one of "Fortune"'s "100 Best Companies to Work For" -- and driving up profits. "*The publisher has aimed for sustainability in all aspects of this book's production, from the inks and glues to the trim size. The interior paper is 100% post-consumer recycled, certified by the Forest Stewardship Council, and ancient-forest friendly. Instead of a jacket, the cover boards are wrapped in 100% recycled paper stock coated in a biodegradable varnish - and these are just two examples among many." "From the Hardcover edition."

Revised edition, includes new foreword by Paul Hawken and and several new chapters by John A. Lanier.

In colleges and universities across the United States, students, faculty, and staff are forging new paths to sustainability. From private liberal arts colleges to major research institutions to community colleges, sustainability concerns are being integrated into curricula, policies, and programs. New divisions, degree programs, and courses of study cross traditional disciplinary boundaries; Sustainability Councils become part of campus governance; and new sustainability issues link to historic social and educational missions. In this book, leaders from twenty-four colleges and universities offer their stories of institutional and personal transformation. These stories document both the power of leadership -- whether by college presidents, faculty, staff, or student activists -- and the potential for institutions to redefine themselves. Chapters recount, among other things, how inclusive campus governance helped mobilize students at the University of South Carolina; how a course at the Menominee Nation's tribal college linked sustainability and traditional knowledge; how the president of Furman University convinced a conservative campus community to make sustainability a strategic priority; how students at San Diego State University built sustainability into future governance while financing a LEED platinum-certified student center; and how sustainability transformed pedagogy in a lecture class at Penn State. As this book makes clear, there are many paths to sustainability in higher education. These stories offer a snapshot of what has been accomplished and a roadmap to what is possible. Colleges and Universities CoveredArizona State University Central College, Iowa College of the Menominee Nation, Wisconsin Curriculum for the Bio-region Project, Pacific Northwest Drury University, Missouri Emory University, Georgia Florida A&M University Furman University, South Carolina Green Mountain College, Vermont Kap'olani Community College, Honolulu, Hawaii Pennsylvania State University San Diego State University Santa Clara University, California Slippery Rock State University, Pennsylvania Spelman College, Georgia Unity College, Maine University of Hawaii--Manoa University of Michigan University of South Carolina University of South Florida University of Wisconsin--Oshkosh Warren Wilson College, North Carolina Yale University

Through a collection of letters written to his best friend and to his father in England, and from his own personal diary entries, John Dodd’s memoir offers a fascinating and amusing glimpse of life as a colonial rubber planter. With true stories and confessions that would make even Somerset Maugham blush, we discover what life was really like for young colonial planters in late-1950s Malaya. Increasing daily rubber output may have been their goal but for the young planters the bigger picture of chasing girls and finding a ‘keep’ was of much greater importance. But life was more than just a series of stengahs in the clubhouse, dalliances in the Chinese brothels of Penang and charming ‘pillow dictionaries’ – there were strikes, riots, snakes, plantation fires and deadly ambushes by Communist terrorists to contend with. Set against the backdrop of the Emergency period, the rise of nationalism and Malaya’s subsequent Independence, A Company of Planters is a very personal, moving and humorous account of one man’s experiences on the frequently isolated rubber plantations of colonial Malaya.

China, India, and East and Southeast Asia: Assessing Sustainability provides unprecedented analyses by regional experts and scholars elsewhere in the world on China, India, and their neighbors. Despite growing demands internally on their natural resources (China and India alone are home to more than one-third of the world's population), the expanding global economic influence of this region makes these countries vital players in a sustainable future for all citizens of the Earth. Regional coverage includes topics such as business and commerce, environmental and corporate law, and lifestyles and values.

Provides a visionary blueprint for a marketplace where businesses and environmentalists work together, showing companies how to redesign and manufacture products in innovative ways, reeducate customers, and work closely with government toward a profitable, productive, and ecologically sound future. Reprint.
