A guidebook through the minefield of government contracting and procurement, Government Contracting: Promises and Perils describes the dangerous practices commonly applied in the development and management of government contracts and provides advice for avoiding the sort of errors that might compromise their ability to protect the public interest. It includes strategies for increasing profits for government contractors, rather than incurring burdensome costs, through compliance with government mandated subcontracting and financial management systems. Drawing from his indepth investigation of government agencies across the country, the author examines present-day scenarios that regularly lead public servants and government committees to manage contracts with tools that are less than optimal and to select contractors that may not be the best qualified. He then delineates practical processes, contracting documents, and contract management tools to mitigate detrimental outcomes and alternative approaches to supplant the imperfect methodologies. The author includes a CD-ROM with the book that provides a number of practical tools that you can apply as well as examples of contracts and templates that are the best he discovered during his research. The book also outlines an approach for performing advance contract planning, conducting contract negotiations, and administering contracts useful when planning for the management of the contracting process throughout the contracting cycle, negotiating a contract that protects the interest of all contracting parties, and ensuring successful contractor performance. The book includes a "Government Procurement Corruption Wall of Shame" that illustrates the myriad perils and stumbling blocks such as conflicts of interest, duplicity, favoritism, incompetence, kickbacks, and protests that government workers fall prey to.. Filled with best practices that protect you from nefarious, amateurish, and criminal mistakes that frequently lead to difficulties with harsh consequences, the book does not end its coverage with discussions of corruption, mismanagement, and ineptitude, but provides practical processes and strategies to diminish the negative impacts from these government contracting perils.

The role of a contracting professional begins well before the teward of a contract and doesn't end until the benefits of the acquisition have been realised, long after the deliverables arrive in a box on a loading dock. Global Contract Logistics tackles the growing complexity of contracting in a technologically accelerating world. The author looks at the common errors and the ten phases of a successful acquisition. Global Contract Logistics examines what it takes to be an intelligent client, one who employs contracting or procurement professionals to obtain goods and services on their behalf. It debunks many commonly held myths involving contracting, procurement and acquisition and outlines ten vital steps towards success for intelligent clients and their supporting acquisition professionals. The text is supported by case studies of projects that the author Steve Morgan has led, during his time with the Ministry of Defence and BAA. Online supporting resources include contract templates for procurement and acquisition projects.

Change is the law of life. This precept holds for individuals and organi-zations alike. Radical change, called transformation, is not so frequent. Organizational transformation entails fundamental changes that encompass the entire gamut of the organization. A successful transformation exercise begins with formulating a set of Objectives at the beginning and ends up with realizing the desired Outcomes. This book delves deep into the intricacies of the life cycle of organizational transformation and explains how it can be managed effectively adopting a systematic and step-by-step methodology. In this well-researched text, the author, J. Satyanarayana, with his vast and varied experience in the field of management and governance, gives a brilliant exposition of managing transformation. The book postulates the O2O (Objectives to Outcomes) framework as a seven-step methodology. The methodology, in a sense, is a meta-framework for transformation. It harmonizes and synthesizes altogether 40 sub-frameworks, which include some well-known concepts, such as Porter's Value Chain Framework, Kaplan and Norton's Balanced Scorecard, and Hammer's BPR framework. The author illustrates the O2O framework through a Case Study on Passport Seva Project, designed by him, and being implemented all over India to transform the quality of passport-related services provided to the citizens. This text, with its blend of theory and practice, would prove extremely valuable to the students of management and commerce. It should also be a valuable reference book to the administrators and management consultants. KEY FEATURES : By expounding the O2O methodology, the book addresses the managerial requirements of conceptualizing, designing and implement-ing major transformation projects. Focuses on the four principal dimensions of transformation, namely, Process, People, Technology, and Business Model while explaining the major concepts. Interspersed with plenty of examples to illustrate the concepts. Includes chapter-end review questions to drill the students in self-study.

This second edition of Contracting for Services in State and Local Government Agencies provides state-of-the-art tools for best practice in the procurement of services at state and local levels, from initial stages through to completion. Including lively case studies and research conducted with state and local agencies across the United States, this book provides management advice and tips on compliance to reduce costs, select the best-qualified contractors, manage contractors' performance, and prevent corruption and waste. Utilizing the results of new research in all fifty states, author William Sims Curry offers updated best-practice documents, methodologies, and templates including: a Request for Proposal (RFP), a scorecard for proposals to select the best-qualified contractor, a toolkit for meeting socioeconomic contracting goals without compromising price, quality, or on-time delivery, and a Model Services Contract (MSC). Special consideration is given to obtaining services and products in states of emergency. Several additional resources for practitioners are available online, including sample contracts and a straightforward, inexpensive tool for tracking contractors' progress and cost management. The roadmap and templates contained in this book and available online to readers will prove essential to state and local government agency contracting professionals and other officials and employees called upon to participate in the drafting of solicitations, writing sole source justifications, writing scopes of work, serving on advance contract planning and source selection teams, recommending award of contracts, or assisting in the management of those contracts.
