This pocket-size guide saves nurses precious time while ensuring that a complete patient record is created and that legal, quality assurance, and reimbursement requirements are met. This handbook provides specific verbiage for charting patient progress, change or tasks accomplished for approximately 50 common problems. The new third edition has been completely updated to include Critical Assessment Findings, Subjective Findings for Documentation, Resources for Care and Practice, Legal Considerations, Time Saving Tips, and new Managed Care information. Plus, roughly 15 additional common problems and diagnoses have been added making this practical resource more valuable than ever. Diagnoses are in alphabetical order allowing for fast and easy access. Each patient problem or diagnosis found in this handbook includes specific documentation guidelines for the following aspects of nursing care: "Assessment of patient problem "Associated nursing diagnosis "Examples of objective findings for documentation "Examples of subjective findings for documentation "Examples of assessment of the data "Examples of potential medical problems for this patient "Examples of the documentation of potential nursing interventions/actions "Examples of the evaluations of the interventions/actions "Other services that may be indicated and their associated interventions and goals/outcomes "Nursing goals and outcomes "Potential discharge plans for this patient "Patient, family, caregiver educational needs "Resources for care and practice "Legal considerations for documentation, as appropriate Introductory chapters describe documentation, the medical record systems of nursing documentation, and current JCAHO and ANA standards related to documentation. Specialty sections provide important and specific guidelines for hospice care and maternal-child care. Appendices provide the latest NANDA-approved nursing diagnoses, descriptions of services provided by other disciplines, abbreviations, and a listing of resources (i.e., directory of resources, clinical newsletters and journals, Internet resources, further reading). Includes Time Saving Tips boxes to help minimize the time needed for documentation responsibilities. Each diagnosis includes a Critical Assessment Components/Findings section to help nurses with their critical decision making and determine whether an assessment finding indicates immediate attention or patient follow up. The Goals/Outcomes section of each diagnosis now appears at the beginning so that nurses know the intended goals and outcomes up front before beginning the assessment. All documentation guidelines now include sections on Examples of Subjective Findings for Documentation and Resources for Care and Practice. Includes Legal Considerations for Documentation as appropriate to highlight important legal issues. Part One has been updated to reflect the current managed care environment, including new information required by the National Community of Quality Assurance [NCQA], so that nurses can incorporate and focus on these changes as they document

Provides information on documentation issues, including electronic medical records, legal and ethical implications, and documentation in acute cases, along with a variety of charting examples.

Ever wonder what to put in a nursing note? This pocket sized guide provides you with over a hundred templates for written and verbal communication in nursing to help you.

"Nurses play a vital role in improving the safety and quality of patient car -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." --Online AHRQ blurb, http://www.ahrq.gov/qual/nurseshtbk.

The AJN Book of the Year award-winning textbook, Psychiatric Nursing: Contemporary Practice, is now in its thoroughly revised, updated Fourth Edition. Based on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

Nursing can be nuts. On a twelve-hour shift, the last thing most nurses want to do is sit down and draft a lengthy note describing the craziness that occurred. Written by a nurse, for nurses, this book is chock full of narrative note examples describing hypothetical situations to help you describe the, well, the indescribable. Some shifts are just like that!

Today, more than 10 million people in the United States require some form of long-term care, a number that is rapidly increasing and will continue to do so for years to come. This concise and user-friendly resource contains the fundamental information long-term care nurses need to provide all aspects of safe and effective care to their patients in nursing homes and assisted living facilities. Written by a renowned and highly respected nurse leader in long-term care and gerontology, it presents key facts and core competencies related to the clinical and managerial responsibilities of nurses in these settings. Details on the specific skills required for this challenging specialty, as well as must-know information on regulatory standards, site visits, management and leadership, and dementia care, are presented in a concise format for quick access to information. The book embodies a holistic approach to nursing that recognizes the importance of quality of life in addition to quality of care. It provides an overview of the unique features of long-term care, addressing the operational differences between these settings and those of acute settings, the distinct responsibilities of long-term care nurses, special needs of the residents, and major clinical challenges. The text offers guidance on the use of evidence-based knowledge within the constraints of long-term care settings. Topics such as legal risks, documentation essentials, and the importance of self-care are covered, along with management and leadership issues relevant to the supervision of unlicensed personnel. The Fast Facts in a Nutshell feature assists readers in reinforcing and applying content, and a comprehensive resource list supplements the text. The book will also serve as a useful study tool for long-term nursing care certification.
