A sizzling debut novel starring a sexy TV chef who steams up more than just entrees... She wasn't his kind of dish-until someone turned up the heat... Celebrity chef and infamous ladies' man Bryce Ryder can't believe the thoughts he's having about his old friend Jenna McCabe. She's always been the shy girlnext-door, but when some bad publicity threatens everything he's built, Jenna gets down to business- and shows a side of herself that is take-charge and totally irresistible. Soon things are heating up in and out of the kitchen-and all of Jenna's secret fantasies about Bryce start coming true. But will she be the one to tame his heart, or is the sexy chef just indulging another one of his cravings?

The first in a brand new series about a world of shapeshifters, from the author of Hot in Here. Hidden from mortals for eternity, Annwyn, the Otherworld, is home to shapeshifters, wraiths and dragons. On the border with the mortal realm stands a nightclub called Velvet Haven. The shapeshifter king of Sidhe, Bran, comes there searching for his brother, Carden, who's ensnared in a centuries-old curse. He looks to Mairi, a mortal woman with an unusual aura, for help. He usually just uses humans for sexual pleasure in order to restore his magic energy, but Mairi's lush curves and teasing caresses inflame him like no Sidhe ever has. He has no idea that the woman he's falling for holds the key to his destruction-or his salvation.

A mysterious stranger sweeps a Scottish beauty off her feet in this enchanting novella of winter's passion and forbidden love... 1869: Isobel MacDonald is spending Christmas at her family's estate in the Scottish Highlands, enjoying her last holiday before she is married off. Isobel has no desire to wed the stuffy earl, especially after she meets a mysterious man who helps her find a treasured clan pin she has lost in the woods. This dark and sensual stranger is from Annwyn, the Celtic Otherworld, where he is prince of the Night Sidhe. Love between mortals and the Sidhe is forbidden, but Prince Daegan casts a spell on Isobel's clan pin, beckoning her to the woods, where he awaits her—willing to risk the existence he has always known for the sake of the one woman he must have... Yuletide Enchantment previously appeared in A Highlander Christmas

For sharp-tongued food critic Miranda Wake, the chance to spend a month in Adam Temple's kitchen to write an exposé is a journalistic dream come true. Surely Miranda can find a way to cut the hotshot chef down to size once she learns what really goes on at his trendy Manhattan restaurant. But she never expected Adam to find out her most embarrassing secret: she has no idea how to cook. Adam's not about to have his reputation burned by a critic who doesn't even know the difference between poaching and paring. He'll just have to give the tempting redhead a few private lessons of his own—teaching her what it means to cook with passion...and doing more with his hands than simply preparing sumptuous food.

Against the Wall By Rhyannon Byrd She's a good girl ready for her turn to be bad. He's a hard-ass set on resisting the inevitable. When temptation lives just around the corner, who knows what wicked wonders will result? Shea Dresden

doesn't need her PhD to know she's more brains than bod-too much bookworm, too little bada-bing!-but this is getting ridiculous. Her sexy nextdoor neighbor, the sinfully irresistible Ryan McCall, has been going out of his way to ignore her for months now. She's flirted, asked him out, done everything but beg-and still come up empty-handed. Tired of waiting for what she wants, Shea hatches a scheme to snag the stubborn ATF agent once and for all. It's the perfect plan, and she's willing to do anything to make it work. But when her little strategy backfires, Shea finds she's being rescued instead of ravished. And she still wants her mind-shattering night of sexual ecstasy. What's a desperate woman to do? Rock his world, of course! Shea's not about to take another no, especially when she's already got the sexy stud in her bedroom. She may have to swallow her pride to get what she wants-but by the end of the night, it's Ryan who's paying all the lip service. Ryan McCall's been burned before, and he knows better than to play with fire. Too bad the shy little scholar living right nextdoor affects him like gasoline on an open flame. He's done his best to stay the hell away from her, but once he gets that first taste, he knows he's in some serious trouble. Shea may be looking for wild times between the sheets, but Ryan soon finds he's ready to convince her to take a chance on a bad boy like himself-forever

This report focuses on the risks of climate change to development in Sub-Saharan Africa, South East Asia and South Asia. Building on the 2012 report, Turn Down the Heat: Why a 4°C Warmer World Must be Avoided, this new scientific analysis examines the likely impacts of present day, 2°C and 4°C warming on agricultural production, water resources, and coastal vulnerability. It finds many significant climate and development impacts are already being felt in some regions, and that as warming increases from present day (0.8°C) to 2°C and 4°C, multiple threats of increasing extreme heat waves, sea-level rise, more severe storms, droughts and floods are expected to have further severe negative implications for the poorest and most vulnerable. The report finds that agricultural yields will be affected across the three regions, with repercussions for food security, economic growth, and poverty reduction. In addition, urban areas have been identified as new clusters of vulnerability with urban dwellers, particularly the urban poor, facing significant vulnerability to climate change. In Sub-Saharan Africa, under 3°C global warming, savannas are projected to decrease from their current levels to approximately one-seventh of total land area and threaten pastoral livelihoods. Under 4°C warming, total hyper-arid and arid areas are projected to expand by 10 percent. In South East Asia, under 2°C warming, heat extremes that are virtually absent today would cover nearly 60-70 percent of total land area in northern-hemisphere summer, adversely impacting ecosystems. Under 4°C warming, rural populations would face mounting pressures from sea-level rise, increased tropical cyclone intensity, storm surges, saltwater intrusions, and loss of marine ecosystem services. In South Asia, the potential sudden onset of disturbances to the monsoon system and rising peak temperatures would put water and food resources at severe risk. Well before 2°C warming occurs, substantial reductions in the frequency of low snow years is projected to cause substantial reductions in dry season flow, threatening agriculture. Many of the worst climate impacts could still be avoided by holding warming below 2°C, but the window for action is closing rapidly. Urgent action is also needed to build resilience to a rapidly warming world that will pose significant risks to agriculture, water resources, coastal infrastructure, and human health.

Hidden from mortals, Annwyn, the Otherworld, is home to shapeshifters, wraiths and dragons. Rhys MacDonald, the mortal great-grandson of a banished prince races to Annwyn to offer help when his ancient homeland is threatened by a dangerous Dark Magick. There he encounters a young goddess and shapeshifter, who thinks he is the mate foreseen in her dreams. Bound together by the flames of desire, they discover that destiny-and the Dark Magick- has other plans for them...

Highlighted by two hundred full-color photographs, a celebration of American crafts and decorative arts and the artists who create them showcases masterpieces of furniture, wood, ceramics, glass, fiber, jewelry, metal, and basketry from the past two centuries, along with a look at how craft has shaped American history, arts, vitality, and identity. 25,000 first printing.

"The main message emerging from this new comprehensive global assessment is that premature death and disease can be prevented through healthier environments--and to a significant degree. Analysing the latest data on the environment-disease nexus and the devastating impact of environmental hazards and risks on global health, backed up by expert opinion, this report covers more than 130 diseases and injuries. The analysis shows that 23% of global deaths (and 26% of deaths among children under five) are due to modifiable environmental factors--and therefore can be prevented. Stroke, ischaemic heart disease, diarrhoea and cancers head the list. People in low-income countries bear the greatest disease burden, with the exception of noncommunicable diseases. The report's unequivocal evidence should add impetus to coordinating global efforts to promote healthy environments--often through well-established, cost-effective interventions. This analysis will inform those who want to better understand the transformational spirit of the Sustainable Development Goals agreed by Heads of State in September 2015. The results of the analysis underscore the pressing importance of stronger intersectoral action to create healthier environments that will contribute to sustainably improving the lives of millions around the world."--Page 4 of cover.
