Hi Scott, Its far better than whatever lights come with each aircraft. You must fiddle around sometimes with the right entry to your CFG, and as Tom said, sometimes you might need to change the spotlight.bmp, as is the case when using shockwave for the iFly 737, but you will definately see a huge improvement with shockwave.

The use of animal models is a key aspect of scientific research in numerous fields of medicine. Movement Disorders, Second Edition vigorously examines the important contributions and application of animal models to the understanding of human movement disorders, and serves as an essential resource for basic neuroscientists engaged in movement disorders research. Academic clinicians, translational researchers and basic scientists are brought together to connect experimental findings made in different animal models to the clinical features, pathophysiology and treatment of human movement disorders. The book is divided into sections on Parkinson's disease, Huntington's disease, dystonia, tremor, paroxysmal movement disorders, ataxia, myoclonus, restless legs syndrome, drug-induced movement disorders, multiple system atrophy, progressive supranuclear palsy/corticobasal degeneration, and spasticity. This book serves as an essential resource for both clinicians interested in the science being generated with animal models and basic scientists studying the pathogenesis of particular movement disorders. Introduces the scientific foundations for modern movement disorders research Contributing authors are internationally known experts Completely revised with 20% new material Provides a comprehensive discussion of genetics for each type of movement disorder Covers Parkinson's disease, Huntington's disease, dystonia, tremors, and tics
