Interval

The 50,000-100,000 mile change interval is much more common in most cars today. Even manual vehicles are able to go farther with modern gear oils than they used to back in the day, and even vehicles used for towing are beginning to push the 50,000 mile mark because of more advanced technology and better formulas.

How Often Should I Change My Gearbox Filter And Oil ...

The first thing to bear in mind is that over-doing it with automatic gearbox oil changes is never a bad thing. You won't harm your transmission by changing the oil more often than the manufacturer recommends. The low end for an automatic transmission fluid change interval is around 30,000 miles (a little under 50,000 km).

How Often Do You Need to Change Your Automatic ...

Bookmark File PDF Manual Transmission Oil Change

Interval 100,000 miles used to be a decent fluid change interval on a manual transmission. The gear oil, on an atomic level, is made of long-chain molecules that prevent wear by literally keeping the gear teeth from contacting each other. Over the thousands of miles of driving the shearing action of the gear teeth tends to chew up these long chain molecules.
