Challenge: A recent study found that self-consciousness and embarrassment were common reactions among dysphagia patients. The findings indicated that those dealing with swallowing challenges felt that others were noticing the effects of their disorder, especially in public dining situations.⁴

A long-respected standard in the psychology of adjustment, Psychology and the Challenges of Life, Eleventh Edition has been thoroughly updated and contemporized to provide students the ability to reflect on how psychology relates to the lives we live and the roles that psychology can play in helping us with the challenges we face. Authors Jeffrey Nevid and Spencer Rathus explore the many applications of psychological concepts and principles used to meet the challenges of daily life, while encouraging students to apply concepts to themselves through active learning exercises, self-assessment questionnaires, and journaling exercises.

In the 13th edition of Psychology and the Challenges of Life: Adjustment and Growth, authors Jeffrey Nevid and Spencer Rathus continue to reflect on the many ways in which psychology relates to the lives we live and the important roles that psychology can play in helping us adjust to the many challenges we face in our daily lives. Throughout, the authors explore applications of psychological concepts and principles in meeting life challenges such as managing our time, developing our self-identity, building and maintaining friendships and intimate relationships, adopting healthier behaviors and lifestyles, coping with stress, and dealing with emotional problems and psychological disorders.

This book considers cultural psychology from historical, theoretical, and epistemological perspectives, building an understanding of cultural psychology as a human science and moving beyond the nature-

culture dichotomy. The unique collection of chapters seeks to advance the field of cultural psychology by reviving its historical legacies and arguing for its social responsibility in future historical developments. It considers European legacies for cultural psychology as developed by leading figures such as Giambattista Vico, Wilhelm Wundt, Wilhelm Dilthey, and Ernst Cassirer in order to provide insights into a long tradition of thinking from a cultural psychology perspective. The book discusses historical pathways in the rise and repression of cultural psychology and its different historical forms, arguing for the necessity of decolonizing psychology, securing a place for culture in it, and developing an epistemology suited to humankind's meaning-making processes in mutual shaping of psyche and culture. It provides an integrative and historical understanding of the subject and uses the diversity and heterogeneity within the field to offer critical reflections on its achievements. The thoroughly international group of contributors brings diverse analyses of self, body, emotions, culture, and society and considers the future of cultural psychology. The volume is a stimulating read for scholars and students of cultural and theoretical psychology and related areas including philosophy, anthropology, and history.

Research in educational psychology has had a huge impact in terms of enhancing understanding and challenging thinking about teachers and learners. *Educational Psychology: Concepts, Research and Challenges* brings together the latest research across many areas of educational psychology, introducing and reporting on the most effective methodologies for studying teachers and learners and providing overviews of current debates within the field. With chapters from international authors, this academic text reveals theoretical overviews and research findings from across the field including: teaching and learning research methods motivation and instruction curriculum – reading, writing, mathematics cognition special educational needs and behaviour management sociocultural and socioemotional perspectives assessment and evaluation. Educational psychology has historically had a focus on students with particular learning needs. This book provides a discussion about the gradual movement toward inclusion and the possibility of developing a more cohesive and potentially more effective education system for all students. It also provides recent research into effective behaviour management and presents specific and valuable techniques employed in applied behaviour analysis. The contributors also deliver analysis on the motivation of students and how home and society in general can contribute towards constraining or enhancing student learning. This book is a must-read for academics, researchers, undergraduate and graduate students who recognize the substantial contribution of educational psychology to increasing our understanding of students and their learning, teachers and their teaching.

This book is both a sequel to and expansion of *Community Psychology*, published in 1992. It serves as a textbook for courses on community psychology but now also includes material on inequality and health, since both are concerned with the way an individual's social setting and the systems with which they interact affect their problems and the solutions they devise. Part 1 sets the scene by locating community psychology in its historical and contemporary context. In Part 2, disempowered groups and their physical and mental health are considered. Finally in Part 3 the application of community psychology is discussed, and the ways in which marginalised people can be helped by strengthening their communities highlighted.

A long-respected standard in the psychology of adjustment, *Psychology and the Challenges of Life*, Eleventh Edition has been thoroughly updated and contemporized to provide students the ability to reflect on how psychology relates to the lives we live and the roles that psychology can play in helping us with the challenges we face. Authors Jeffrey Nevid and Spencer Rathus explore the many applications of psychological concepts and principles used to meet the challenges of daily life, while encouraging students to apply concepts to themselves through active learning exercises, self-assessment questionnaires, and journaling exercises.

"According to Leo Tolstoy's famous statement "all happy families are alike, each unhappy family is unhappy in its own way". Knud Larsen in his book on human happiness proves the opposite. Summarizing the classical and recent research in successful human adaptation, adjustment and well-being of the soul and body he shows the many faces of individual human happiness. Moreover, the book opens the perspective into the directions of social, cultural and biological evolution. What I like most in the book, is its usefulness. Knud has many practical pieces of advice suggesting that we can improve our well-being if we try. I wish Anna Karenina had read this well-conceived, well written text.", Gyorgy Csepeli, Professor of Social Psychology, Chair of the Interdisciplinary Social Research Program of the Doctoral School of the Faculty of Social Science at ELTE, Senior Research Fellow of the Institute of Advanced Studies at Kőszeg (iASK) "This unique, reader-friendly volume covers psychological aspects of successful living with such diversity and depth that I have not encountered hitherto. It is essential reading for psychology undergraduates as well as more seasoned academics and practitioners", Howie Giles, Distinguished Professor Communication, University of California, Santa Barbara, USA & Honorary Professor of Psychology, University of Queensland, Australia "This book by Professor Larsen is very enjoyable reading and covers the many challenges humans face across the lifespan. The focus is on positive psychology as supportive solutions are offered for the many challenges of living. This is also a relatively rare book that evaluates adaptation from a socio-cultural perspective since most books today emphasize cognitive aspects of coping and development. I especially appreciated how Professor

Larsen weaved his salient knowledge of cross-cultural psychology into this important work on human adaptation. In the book the author discusses the issue of adaptation in its varying aspects of human life and through the prism of cultural influence on personality and behavior.", Askar Jumageldinov, Ph.D, Assistant Professor at Catholic University in Lyon "This book uniquely ties together the author's personal experiences with in-depth research on human adaptation. What strikes the reader is the very personal narrative that illustrates the many points of struggling with the challenges of being human. The book combines the best of classical literature along with very current and meaningful research. The whole human journey is evaluated from identity and finding meaning, through optimizing health in midlife to facing the final existential questions related to both death and longevity. A very thoughtful book.", Sven Mørch, Ph.D , Professor, University of Copenhagen "An enlightened and enlightening story of the challenges we meet through our life course. Although the general reader may find useful information to the journey of life it is also a volume packed with research-based information from the psychological and social sciences with implications for how we can grow as human beings and live satisfying lives together.", Reidar Ommundsen, Professor Emeritus, University of Oslo "I have found the work of Knud Larsen to dovetail with my own work on behalf of indigenous and third world peoples since I first became acquainted with him in the context of supporting the People of Cuba. Dr. Larsen, as manifest in this career-capping work, has the ability – rare among non-ethnologist academics – to be engaged in the inner cognitive world of people inside other cultures while viewing their society in his own unique perspective. This broad and deep treatment will deepen and broaden my own view of the peoples that I have engaged with on the cognitive level. It also broadens my view of the challenges of my own life and how to live a happy life.", John Allison, Cognitive ethnologist and author
