A robot is typically made either of plastic or a metal. There are mainly three parts of a robot:

Controller - The computer program that controls every action of a robot, in short, the brain of the robot.

Mechanical parts - All the mechanical parts like wheels, grippers, motors that help a robot to move.

Everything You Need to Know
About Warehouse Robotics.
September 21, 2020. In the
history of the supply chain,
the earliest robots were in
manufacturing. The first
robot could only move
material for at least a
dozen feet. General Motors
were the first to install a
robot in their plant in
1962. For the longest time,
robots were only suitable
for working in industrial
manufacturing plants because
