to rethink how we conceptualize technology, its use and development. The volume addresses fundamental issues at different levels. The first part revolves around the biological impacts that technologies are producing on our bodies and brains. The second part focuses on the psychological level, exploring how our psychological characteristics may affect the way we use, understand and perceive technology, as well as how technology is changing our cognition. The third part addresses relevant theoretical problems, presenting reflections that aim to reframe how we conceptualize ourselves,

technology and interaction itself. Finally, the last part of the volume pays attention to the factors involved in the design of technological artifacts, providing suggestions on how we can develop novel technologies closer to human needs. Overall, it appears that human-computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape.

This practical guide to animal tracking is a one-of-its-kind manual, based on information developed with the help of southern Africa's few remaining traditional trackers and their centuries-old wisdom in the field. It presents the more concrete and obvious wildlife signs for some 160 animals and teams them with a host of seemingly unrelated details to give a comprehensive picture of recent - and not-so-recent - traffic through the bush. Simple, bulleted text guides readers through the key points and teaches
