In The Copernicus Complex, the renowned astrophysicist Caleb Scharf takes us on a scientific adventure, from tiny microbes within the Earth to distant exoplanets, probability theory, and beyond, arguing that there is a solution to this contradiction, a third way of viewing our place in the cosmos, if we weigh the evidence properly. As Scharf explains, we do occupy an unusual time in a 14-billion-year-old universe, in a somewhat unusual type of solar system surrounded by an ocean of ...

The Copernicus Complex: Our Cosmic Significance in a ...

In The Copernicus Complex, the renowned astrophysicist and author Caleb Scharf takes us on a cosmic adventure like no other, from tiny microbes within the Earth to distant exoplanets and beyond, asserting that the age-old Copernican principle is in need of updating. As Scharf argues, when Copernicus proposed that the Earth was not the fixed point at the center of the known universe (and therefore we are not unique), he set in motion a colossal scientific juggernaut, forever changing our ...

The Copernicus Complex: The Quest for Our Cosmic (In ...

The Copernicus Complex addresses a perennial mystery: the cosmic significance (or perhaps the insignificance) of life on Earth. Caleb Scharf summarizes current debates on how life began and how pervasive it is, explaining how our perspective has been changed by the recent discovery that there are millions of Earth-like planets in the Milky Way.

The Copernicus Complex: The Quest for Our Cosmic (In ...

The Copernicus Complex: Our Cosmic Significance in a Universe of Planets and Probabilities (Hardcover) by Caleb Scharf Nicolaus Copernicus is credited with the realisation that the Earth is not at the centre of the Universe, but orbits around the Sun. This was a key step in the development of the idea that we do not occupy a special place in the Universe, and that, by implication, there may be nothing special about us, cosmically speaking.
