Digital Transformation In Connected Mobility

When worlds collide There's a reason OT teams running the facilities are so often resistant to the digital dreams of IT innovation teams. While the IT engineers are on a mission to change the way the company operates, the operators themselves are committed to meeting the company's existing production goals.

A low risk approach to smart manufacturing innovation

When Worlds Collide - The Industrial Internet From the explanations above we can see that, traditionally at least, IT and OT have had fairly separate roles within an organization. However, with the emergence of the Industrial Internet and the integration of complex physical machinery with networked sensors and software, the lines between the two teams are blurring.
